**ClimateCase Supports Upcoming 10<sup>TH</sup> Annual George Lopez Celebrity Golf Classic; Provides Attendees with the First and Only Insulated Cell Phone Case**

*Celebrity Golf Attendees to Receive Smartphone Case that Protects from Overheating and Freezing*

**TOLUCA LAKE, Calif./LOS ANGELES** —April 24, 2017—This year, celebrity golfers won't have to worry--their cell phones will be protected from shutting down due to hot temperatures. The founders of the [ClimateCase](#), the first and only insulated cell phone case that protects from overheating and freezing, is supporting the popular [George Lopez Celebrity Golf Classic](#) by donating more than 200 cases to celebrity golfers. This golf classic, which takes place on Monday, May 1 from 9am to 8pm in Toluca Lake, Calif., is celebrating its 10<sup>th</sup> anniversary and will offer several rounds of golf, amazing food, giveaways and live entertainment.

“We are honored to support the George Lopez Foundation and its goal of increasing awareness for kidney disease,” said ClimateCase’s CEO Lisa Lambert. “We developed ClimateCase to make sure people are never left out of touch if their cell phone dies due to prolonged exposure to harsh temperatures, especially during emergency situations.”

In addition, Lambert wanted to give back to the organization even more by offering monetary donations. For example, when customers purchase the ClimateCase, they can enter the promo code GLFNDN and receive \$5 off the case and \$5 will be donated to the George Lopez Foundation.

“Funds raised from this event help send children with kidney disease to summer camp,” said Gabrielle Chanel, project manager for the George Lopez Foundation. “Special

thanks to all of our wonderful in-kind donors like ClimateCase and sponsors who help make our events and programs happen.”

ClimateCase’s multi-layered neoprene insulation system provides thermal protection for smartphones. This patented technology, which does not exist anywhere in the world, will prevent any smartphone from overheating in extremely hot conditions, and from freezing in extremely cold conditions. In addition, ClimateCase also protects smartphones against accidental drops which is the number one cause of cell phone damage.

“This is amazing... in less than 60 seconds, ClimateCase can quickly restore your phone to its optimal temperature,” said Larry Monte, ClimateCase’s COO.

ClimateCase is machine washable and fits most cell phone brands and models. The case costs \$39.99 and is available in the following colors: charcoal, pink, orange, camouflage and floral. Climatecase is available at [www.BestBuy.com](http://www.BestBuy.com); [www.Walmart.com](http://www.Walmart.com); [www.eBay.com](http://www.eBay.com); [www.Amazon.com](http://www.Amazon.com), [www.Staples.com](http://www.Staples.com) and [www.climatecase.com](http://www.climatecase.com).

Since tablets/i-Pads also have this overheating and freezing issue, the ClimateCase 900 Series is currently in production with a tentative launch date of Spring of 2018.

### **About ClimateCase**

*Launched in 2016, ClimateCase was developed to protect smartphones from overheating and freezing. The multi-layered neoprene insulation system provides thermal protection from extremely hot or cold conditions. After realizing this type of technology does not exist anywhere in the world, Founders Lisa Lambert, CEO and Larry Monte, COO conducted research and testing for more than three years in order to develop a top-of-the-line product. Additional information is available at [www.climatecase.com](http://www.climatecase.com).*

### **About George Lopez Foundation**

*The George Lopez Foundation creates positive, permanent change for underprivileged children, adults and military families confronting challenges in education and health, as well as increasing community awareness about kidney disease and organ donation. Additional information is available at [www.georgelopezfoundation.org](http://www.georgelopezfoundation.org).*
